Places

Plate tectonics
Earthquakes
Volcanos 🌋
Mountains
Rivers
Coasts

Students learn about the physical environment, they learn about the human environment/activities and how they interact with each other.

Students learn about the physical environment, they learn about the human environment/activities and how they interact with each other.

Students undertake a geographic investigation worth 20% in their leaving cert. This involves a day out at a river or coastal area. Students conduct an investigation using a variety of skills and tools.

Get into Geography

Physical Geography

Plate tectonics, volcanoes, rivers, coast, mass movement.

Human Geography

Population, migration, settlement.

Geographical skills

O.S. Maps, aerial photographs, charts, graphs.

Geographical Investigation
